Subject: Microsoft Settlement

Attention: Ms. Renata B. Hesse, Trial Attorney, Department of Justice, Washington D.C.

Microsoft has for many years provided products to consumers and businesses and has also provided opportunities for other such companies to develop programs for the Windows system as well. The settlement worked out by the Department of Justice and the bipartisan group of state attorneys general to bring the anti-trust case to an end should be agreed to by all parties in order for people to return to work especially during this critical period we are now facing in our economy. We support the Department of justice and the Attorneys General for their untiring efforts to put an end to this case and agree to a settlement that is in our nation's best interest. We don't need any more people added to our unemployment roles.
